

DOCUMENT SECURITY EVENTS

NAME: - ARSALAN RASOOL RATHER

DOMAIN: - RED TEAMING

ORGANISATION: - CYART

Lab Documentation Report

Tools: Windows Event Viewer | Wazuh | Elastic SIEM

1. Objective

The objective of this activity was to document security events in a structured format to support incident investigation and response. Event information was collected from security monitoring tools and recorded using a standard incident documentation template.

2. Event Documentation Template

The following template was used to document security events:

Date/Time Source IP Event ID Description Action Taken

3. Mock Security Event

A simulated brute-force attack was performed against the Windows VM by generating multiple failed login attempts. The event was identified through Event Viewer and monitored through Elastic Security.

Date/Time	Source IP	Event ID	Description	Action Taken
2026-06-01 10:00:00	192.168.56.101	4625	Multiple failed login attempts detected	Investigated and documented
2026-06-01 10:01:00	192.168.56.101	4625	Failed authentication attempt	Monitored
2026-06-01 10:02:00	192.168.56.101	4625	Potential brute-force activity	Alert generated

4. Event Analysis

The recorded events showed repeated failed authentication attempts originating from IP address 192.168.56.101. Multiple Event ID 4625 entries were generated within a short period, indicating possible brute-force behavior. The event was documented and escalated for further review.

Security Event Documentation				
System: Windows VM		Date: June 01, 2026		
Monitoring Tool: Wazuh / Elastic SIEM		Environment: Lab		
Analyst: SOC Analyst		Purpose: Document and track security events		
Date/Time	Source IP	Event ID	Description	Action Taken
2026-06-01 10:00:00	192.168.56.101	4625	Multiple failed login attempts detected for user 'Administrator'.	Investigated and documented.
2026-06-01 10:01:00	192.168.56.101	4625	Failed authentication attempt for user 'Administrator'.	Monitored the source IP.
2026-06-01 10:02:00	192.168.56.101	4625	Failed login attempt.	Alert generated in SIEM.
2026-06-01 10:03:00	192.168.56.101	4625	Failed login attempt.	Monitored.
2026-06-01 10:04:00	192.168.56.101	4625	Failed login attempt.	Monitored.
2026-06-01 10:05:00	192.168.56.101	4625	Failed login attempt.	Monitored.
2026-06-01 10:06:00	192.168.56.101	4625	Failed login attempt.	Monitored.
2026-06-01 10:07:00	192.168.56.101	4625	Account lockout due to multiple failed login attempts.	Account locked and access restricted.
2026-06-01 10:15:22	192.168.56.104	7045	A new service 'TestService' was installed on the system.	Verified service and documented.

Figure 1: Security event documentation template used to record and track failed login events.

5. Conclusion

Proper documentation of security events enables analysts to maintain accurate incident records, support investigations, and improve response effectiveness. The documented failed login events demonstrated how structured reporting assists in identifying suspicious activity and tracking security incidents.
